Welcome to Our Family!

Clipper care

STEP 1

Inspect Your Clipper

Make sure your clipper is in proper working order and contains all of the contents listed on the packaging.

Kit contents vary according to kit purchased

STEP 2

Oil the Clipper Blades

Place 2 drops of oil (provided with this kit) onto the front clipper blades. Turn clipper on to disperse oil. Then shut clipper off and wipe off excess oil with a clean, dry towel.

We've been a family since 1919. Welcome!

Quick Start Guide for grooming

STEP 1

INTRODUCE

Introduce the clipper to your pet

Turn on the clipper and without touching your pet with the blade, gently rub it against your pet. This helps acclimate it to the sound and vibration.

STEP 2

BATHE

Prior bathing makes clipping easier

To avoid snagging and pulling your pet's hair during clipping, always bathe prior to cutting hair to clean and condition.

STEP 3

BRUSH

Brush Hair Thoroughly

After bathing, brush your pet's coat to remove large pieces of debris and knots that were not removed during bathing.

STEP 4

Q & A

Questions and How-To's

For complete instructions on how to use your clipper, check out the instruction book provided in your kit. For helpful How To videos, please visit: pets.wahl.com
